

Ecotek Student Scientist Receives Full Scholarship to Top Prep Schools

Students in the Ecotek Lab program are in high demand. Colleges and prep schools are aggressively pursuing them for summer internships, research positions and academic scholarships. On March 9, 2013, Danielle Young, a first year student scientist in the program, received acceptance letters and full academic scholarship offers to attend Phillips Academy (Andover, Massachusetts), Choate Rosemary Hall (Wallingford, Connecticut) and The Taft School (Watertown, Connecticut).

Danielle is a unique young lady with many gifts. Her goal is to be an environmental scientist. Her research has focused on climate change and atmospheric water. In January 2013, she presented her research on cave ecosystems at the Renewing Native Ecosystem Conference at Michigan State University. Danielle will make her prep school decision in April 2013.

About the Ecotek Science Program

Ecotek is a science research lab program for young inventors and researchers in grades 5 thru 12. Student scientists work on projects aligned with the issues being addressed by world leaders at the United Nations. To learn more about Ecotek Lab go to <http://www.ecotek-us.com>
