

Ecotek Scientist Secures Internship at the National Biofuels Energy Laboratory

The skills that students develop in Ecotek Lab are valuable. This is demonstrated in a number of ways. Many student scientists leverage their time in the program to secure research positions at universities and national laboratories. Antoine Crews, a 12th grade student scientist in the Ecotek Lab Program, has leveraged his research portfolio to secure an internship at the National Biofuels Energy Lab (NBEL).

Antoine will be manufacturing and testing biofuels at NBEL. His research in Ecotek Lab has spanned from nuclear energy to fuel cells to wind energy. He recently completed the first phase of work on a saltwater powered aquatic biosphere. Upon graduation, Antoine is planning to major in engineering at a four year university.

About the Ecotek Science Program

Ecotek is a science research lab program for young inventors and researchers in grades 5 thru 12. Student scientists work on projects aligned with the issues being addressed by world leaders at the United Nations. To learn more about Ecotek Lab go to <http://www.ecotek-us.com>
